

# Homework 11(Due at 11:59pm on 2015/04/10)

---

You need to use Yahoo!Pipes and Yahoo!Query Language (YQL) to create a mashup project.

Make sure that your mashup project contains at least **three** data sources and **one** YQL module.

## Things to Submit:

A readme file, which contains the following information

1. Briefly describe your mashup application.
2. Describe the data sources used in your mashup
3. Describe your YQL query
3. A link to your Yahoo! Pipe

## References

Yahoo!Pipes <https://pipes.yahoo.com>

Yahoo!Query Language <https://developer.yahoo.com/yql>

**Please zip all your submitted files into one zip file and use your full name for the zip file's name.**
